PROJECT SPOTLIGHT

324 Queen Street

Industry : Commercial Sector

Location : Brisbane CBD

Stakeholder	
Architect :	Archway Commercial Interiors

BACKGROUND

A lobby design is essential as it sets the scene and level of professionalism for clients before entering a specific floor in a building. The 324 Queen Street lobby design uses bold features and exciting forms to do just that. A seamless custom-made ceiling light that mirrors the shape of the lobby from the front entrance to the elevator was required. The smooth and continuous form of the light provides an elongating illusion. The linear light follows the buildings form and leads into an abstract pendant at the end, which sits at the centre of the lifts, illuminating the space with purpose.

OUR SOLUTION

Mlight successfully collaborated with the Archway Commercial Interiors team to tailor this bespoke solution for the client. The intertwined circles and curved run of the Swerve 76 encapsulate the elegance and sophistication of this profile. The outcome showcases this one-of-a-kind statement piece in a contemporary commercial lobby space. This custom-built solution provides a welcoming directional cue for guests who enter this building. This results in a combination of creative lighting solutions and pure functionality captured in one profile – Swerve 76.
