PROJECT SPOTLIGHT

LinkedIn Head Office

Industry : **Commercial**
Location : **Victoria**

Stakeholders:	
Architect :	Rapt Studio.
Engineer:	Aston

BACKGROUND

hen your philosophy is to connect professionals around the world to increase their productivity and make them more successful, it only stands to reason that any LinkedIn office would completely embody this concept. So when we were asked to supply lighting for LinkedIn's new Melbourne head office in the South Bank IBM Tower, we knew we would be part of something incredible.

Our clients, Rapt Studio architects and Aston engineers, envisioned a space that inspired the LinkedIn team to reach even greater heights while providing the facilities to collaborate and allow their creative juices to flow. We knew our Kleo and Polar LED's were a perfect choice and, matched with the building's industrial style, we created a flawless balance between sophistication and functionality.

OUR SOLUTION

As every lighting designer's dream and brimming with options, we suspended the Kleo at an optimal height between the feature beams in the office area and in the gym to ensure light hit exactly where it was needed while minimising glare for the team. The Polar was the perfect choice for the conference rooms, adding a touch of luxury and softly illuminating the entire space.

Working with out clients, we were able to provide an elegant lighting solution that we hope will support the LinkedIn team to hustle even harder.
