Location: **6 Macquarie St, Sydney, New South Wales**

| **Stakeholders:** | |
|---|---|
| Architect | : Kann Finch Redstone |
| Electrical Engineer | : TCG Consulting Engineers |
| Electrical Contractor | : Fairview Electrical Services |

### BACKGROUND

The NSW Parliament House was the inaugural meeting place for Australia's first parliament for political and governance functions. Its current cluster of buildings on Macquarie Street, which continues to host the Parliament of NSW, is the oldest surviving building in Sydney's CBD. mLight Group, working alongside Kann Finch Redstone, TCG Consulting Engineers, and Fairview Electrical Services, is proud to deliver lighting solutions supporting the project's design goals and the activities within.

### OUR SOLUTION

The colour palette of the NSW Parliament House emanates a warm and inviting aesthetic. White walls complemented by wooden furniture create a cohesive atmosphere throughout the office. Adding a distinctive touch, the unique lighting fixtures are crafted from a large planter box with our cutting-edge curved lighting solution, the Swerve 47.

Meticulously crafted to meet precise length and radius specifications, the Swerve 47 fits seamlessly within the planter box and emits even and superior illumination at 3000K with CRI90+, complementing the overall warm tone aesthetic. Opting for a sleek black finish to align with the planter box, the Swerve 47 met and exceeded expectations. Its remarkable lighting performance, coupled with an eye-catching design, effortlessly elevates the space's overall aesthetic.
